

## Making a Start List

Once all bibs are assigned, you must construct your start lists.

Click on the Manage Runs button:-

This will change you to the Manage Runs window:-

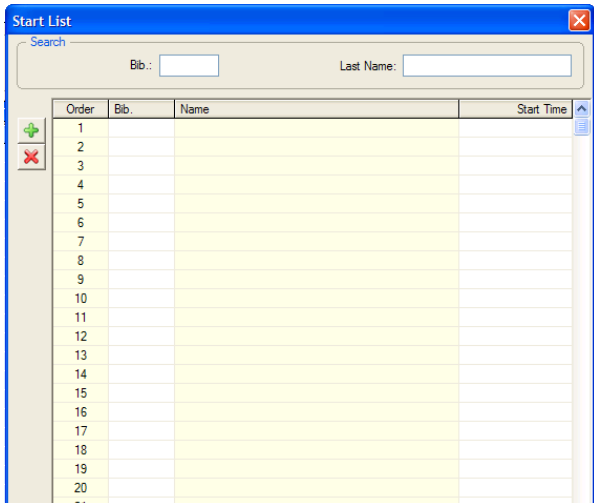

You start in Runs 1 of 2 if yours is a two run race:-

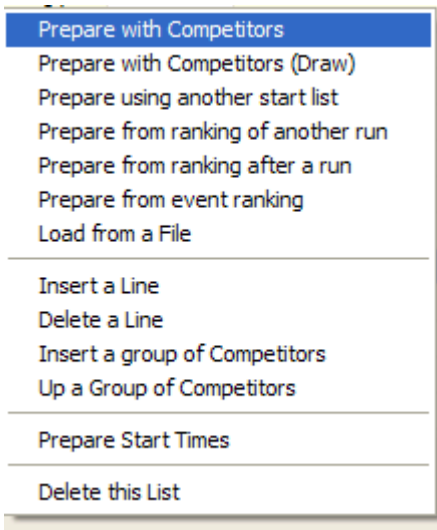

You select runs by using the arrows shown above.

Click on  button and if your timing device is not a Tag Heuer and the dongle is not installed you will get a warning, just click OK to move beyond the warning. This will appear:-

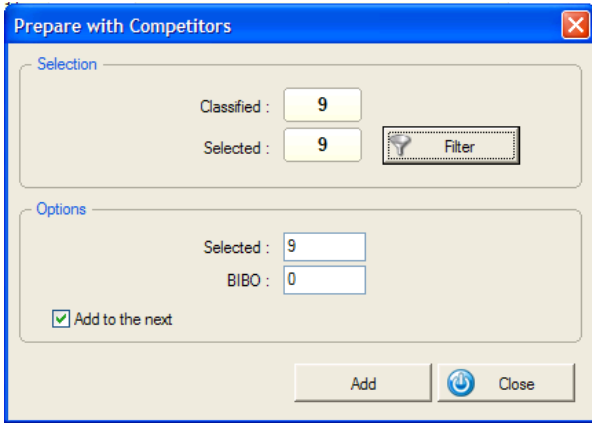

Using the  button at the bottom select “Prepare with Competitors”:-

This will appear:-

Click the OK button and this will appear:-

This is where you can apply filters once again to let the best runners go first or similar options. I am just going to run then in bib order hence click “Add” and the “Close”.

Then Click OK in the Start list Window, this returns you to the Manage Runs window.

I am going to run the second run in reverse order. Simply be reversing the bib numbers as shown below:-

This produced the display below:-

Order	Bib.	Name
1	41	Eastwood Clint
2	40	smith Graham
3	32	Bloggs Fred
4	31	MAIER Hemann
5	30	Wayne John
6	22	LYON Michael
7	21	MAINO Giovanni
8	20	LYSDAHL Espen
9	10	smith Susan

Note the bibs in reverse order.

Using options shown above I could have not assigned the second run order until the first run was complete. Then I could run them slowest first fastest last, etc etc.

As shown below:-

This option is achieved from the Options button, “prepare with ranking from another run”.

Now we are ready to race
